

EXHAUST BELLOWS

TRP EXHAUST BELLOWS

Constructed of austenitic stainless steel, with 4 layers of material (2x the competition), and kitted with necessary gaskets and clamps in one package, **TRP Exhaust Bellows** are the clear choice for quality aftermarket bellows.

TRP Bellows are designed and engineered having quality and value in mind, offering heavy duty diesel exhaust bellows that will perform by absorbing the movement of the exhaust system while meeting the engine manufacturer's recommended maximum leak rate to maintain EPA compliance of the exhaust system. This TRP line

includes torsional bellows for the OE applications that require torsional flexibility. Torsional bellows prevent premature wear and allow longer performance than will fit aftermarket options.

The **TRP Exhaust Bellows** program covers "All Makes" applications for heavy duty trucks and school buses giving you an option to target vehicles out of warranty and provide a direct replacement part that satisfies EPA standards. The program includes all popular Freightliner, Navistar, Volvo, Peterbilt, Kenworth and Blue Bird applications, with less than 20 parts numbers.

FEATURES & BENEFITS

- » Direct replacement for popular applications
- » Provides isolation to protect more expensive components of the exhaust system
- » Near Zero-leak
- » Easy installation, sold as kits with all parts needed
- » Up to 20x longer life than non-EPA compliant flex hose assemblies
- » Torsional bellow for required applications
