

EXIDE PREMIUM XTREME BATTERIES

PX-31 PREMIUM XTREME

PX31 Premium Xtreme batteries, manufactured by Exide Technologies are built tough for strong, reliable performance. They meet or exceed many OEM ratings with up to 1,000 cold cranking amps (CCA) and 180-200 reserve capacity (RC) minutes. Flooded anchor bonding provides vibration protection with a shock absorbent cushion that locks plates securely in place. The full line of PX-31 Premium Xtreme batteries add stamina to trucking demands and conditions – long haul, short haul, pick up and delivery, desert heat and freezing cold.

Note: Exide PX31 Premium Xtreme brand batteries are warranted for 24 months from date of retail sale. Exception: PX6V27 is a 12 month warranty.

Features & Benefits

- **IN-BOARD LUG DESIGN** Improves resistance to vibration and shortens current path to help increase CCA performance.
- **CONVENIENT LIFTING SLOTS** Allow for easier handling and installation.
- **THREADED OR SAE AUTO POSTS** Allows for easy replacement and exact original equipment fitment.
- **UNIQUE MANIFOLD VENT SYSTEM** Eliminates virtually all corrosion from terminals.
- **EASY INSTALLATION & REMOVAL** Ergonomic suitcase handle folds flush with manifold cover for easy installation and removal. Thick, robust design features finger notches on the upper side of the handle. Case also features side grips for easy installation and removal.
