

# STAINLESS STEEL HALF TANDEM FENDERS

Part Number: HF00161

Nu-Line fenders are designed to help protect your truck and trailer from dents, rust and other damage caused by rocks, snow, ice and tar. Harsher winters and road chemicals are causing more damage to your truck and trailer than you know.

Increase the value of your truck with attractive stainless steel half tandem fenders. Installing these fenders will help lower your weight by reducing build-up of dirt, mud, ice and snow. Studies have shown that half tandem fenders have aerodynamic advantages over quarter fenders and could result in significant fuel savings!

## Features & Benefits

- Available in mirror finish stainless steel or aluminum diamond plate
- Different gauges: 18, 16 and 14 gauge
- 24" width (some styles available in 19" width)
- Smooth, 3 rib or 4 rib construction
