

# AIR TREATMENT AD-IS AIR DRYER

PACCAR Genuine Parts AD-IS® Air Dryer Module, is an integrated solution air dryer for removing liquid, vapor and solid contaminants from the vehicle's braking air system. The spin-on cartridge design makes replacement quick and easy. Multiple (4) pressure protection valves located directly on the module allow accessories to be plumbed straight from the air dryer as opposed to connecting through either of two air system reservoirs. The modular design of AD-IS® air dryer module combines the vehicle supply reservoir, governor and a number of charging system components to reduce weight, minimizing connection leak points and eliminating many maintenance trouble-spots.

### FEATURES & BENEFITS

- The modular design combines the vehicle supply reservoir, governor and a number of charging system components, to centralize maintenance trouble spots.
- Spin-on design allows desiccant cartridge change in under 10 minutes, minimizing fleets maintenance and downtime.
- Four (4) pressure protection valves ports for multiple accessory connections.

### RELATED PARTS

- Bolt Kit - 5009233
- Splash Shield Kit - 5006698
- Air Dryer Cartridge – 5008414
- PuraGuard Dryer Cartridge – 5008414
- Extended Purge Reservoir – 5009028
- Purge Reservoir – 508574

### APPLICATIONS

Commercial Trucks with  
Pneumatic Braking System – Air  
Treatment
