

BRAKE DRUMS

OE Brake Drums Designed for Superior Performance and Long Life!

PACCAR Genuine Parts brake drums offer robust and reliable braking solutions for a wide range of heavy-duty vehicle applications. TruTurn™ brake drum design uses fully machined turn to balance technology to eliminate deviations in wall thickness providing better strength in cooling. Every PACCAR Genuine Parts brake drum design is certified to meet Federal Motor Vehicle Safety Standard testing requirements and superior design capabilities are used to develop the most durable brake drums available on the road today for heavy-duty truck and trailer applications. PACCAR Genuine Parts drums are available to meet a wide range of vehicle specifications.

Benefits

- All PACCAR Genuine Parts brake drums are balanced for vibration free operation.
- TruTurn™ drums are “Turned to Balance” for uniform wall thickness.
- 95% of TruTurn™ surface is machined for improved dimensional consistency.
