

BATTERIES

BAF31S91EXCH

BD31S71EXCH

BT31S91EXCH

FAHRENHEIT TECHNOLOGY

FEATURES & BENEFITS

- » **Battery Design**
Absorbed Glass Mat (AGM)
- » **Fahrenheit Thermal Shielding Technology**
Thermal prevention system extends battery life under hot and normal operating conditions
- » **Thermal Resistant Container**
Exclusive reinforced design and high-temperature case - protects AGM performance in adverse environments
- » **Life Extending Catalyst**
Reduces rising internal temperatures, optimizes recombination and recharging conditions

DUAL PURPOSE

FEATURES & BENEFITS

- » **Battery Design**
Flooded
- » **Heavier, thicker plates**
Provides both starting and cycling power, plates will not buckle under multiple charge and discharge service
- » **Web Encapsulation**
Protects positive plate performance in cycling service applications
- » **Flush top cover design with integrated handle**
All makes design enabling fitment in all Class 6 – 8 applications

STARTING

FEATURES & BENEFITS

- » **Battery Design**
Flooded
- » **Calcium Lead Alloy**
Maintenance - free
- » **Full Frame Positive and Negative Grids**
Direct all of the available cranking power to the terminal, eliminates shorts due to punctured separators
- » **Anchor lock elements**
Internal elements and bonded to the bottom of the group 31 case, resisting the damaging effect of vibration

NOTE:

TRP batteries are warranted for 24 months. The first 12 months include parts and labor if applicable. The extended 12 months include part only.

The following parts and battery types are only covered by a 12 month parts warranty: BT31S93EXCH, BT31P93EXCH, Equipment, Marine, and Golf Cart (Groups 1, 4, 24M, 27M, 30H, 3ET, 4D, 4DLT, 7D, 8D, GC-2).
