

Parts for Trucks, Trailers & Buses

DIESEL EXHAUST FLUID

FEATURES & BENEFITS

- » High Purity Requirements
- » ISO 22241-1
- » API Certification
- » Non-Flammable
- » Non-Hazardous
- » Stable and Colorless
- » Non-Toxic and Non- Polluting

Additionally TRP offers a full line of quality DEF Dispensing Equipment.

Ask your TRP Distributor for a full catalog.

CLEANBLUE® DIESEL EXHAUST FLUID (DEF)

The Basics of SCR. All 2010 & newer engines using select catalytic reduction (SCR) technology will be equipped with a tank holding liquid DEF. From the tank, DEF is routed to the exhaust system where it is injected into the hot exhaust gas stream. The DEF vaporizes forming ammonia and carbon dioxide. With the help of the SCR catalysts, ammonia then converts nitrogen oxide to harmless nitrogen and water, ensuring the truck's emissions are EPA compliant.

TRP CleanBlue is API Certified. The American Petroleum Institute (API) certifies manufacturers of DEF by reviewing manufacturing processes and monitoring chain of custody of the product. Drivers should never put DEF into their tanks that is not API Certified. Poor performance, EPA liability, and fouled injectors are a few of the problems that can result.

TRP CleanBlue is Safe to Handle and Store. CleanBlue is non-toxic and non-hazardous. Shelf life can be in excess of 1 year if stored in moderate temperatures. In either hot or cold extremes, shelf life can degrade to 6 months. Outside storage is not recommended without suitable insulated/ heated storage solutions.

PRODUCT OFFERING

TRP	Description
CB0025	2.5 Gallon Jug
CB0550	55 Gallon Drum
CB2750T	275 Gallon Refillable Tote
CB3300T	330 Gallon Refillable Tote
CB2750S	275 Gallon Tote Swap
CB3300S	330 Gallon Tote Swap
CBTOTE-REF1LL	Tote Refill
CBTANK-REF1LL	Bulk Refill
CBBULK5K	5000 Gallon Tanker
