

## TRP FAN BLADES

TRP Fan Blades, designed and approved by PACCAR, provide replacement units for Kysor and Flex-a-lite applications. With a near zero balance achieved through advanced manufacturing techniques, these fans improve fan clutch bearing life and ensure uniform performance. These quality parts are offered at an affordable price and are backed by PACCAR Parts' standard 1-year warranty.

### FEATURES & BENEFITS

#### » OEM Approval

Designed, tested, and approved by OEMs, including PACCAR, ensuring high quality and reliability.

#### » Wide Compatibility

Available as replacement units for the majority of Kysor and Flex-a-lite fan applications, providing versatile options for various needs.

#### » Near Zero Balance Manufacturing

Achieved through a computer-controlled injection molding process, resulting in enhanced performance and longevity.

#### » Improved Bearing Life

Precision balancing significantly improves fan clutch bearing life, reducing maintenance costs and downtime.

#### » Uniform Blade Performance

Innovative balancing method using strategically placed weights and laser technology ensures uniformity of all blades, eliminating the optical illusion of movement at full RPM.

#### » E-Coat Protection

Controlled coating process on the center disk prevents balance issues and offers superior rust deterrence, enhancing durability.
