TURBOCHARGERS

TRP TURBOCHARGERS

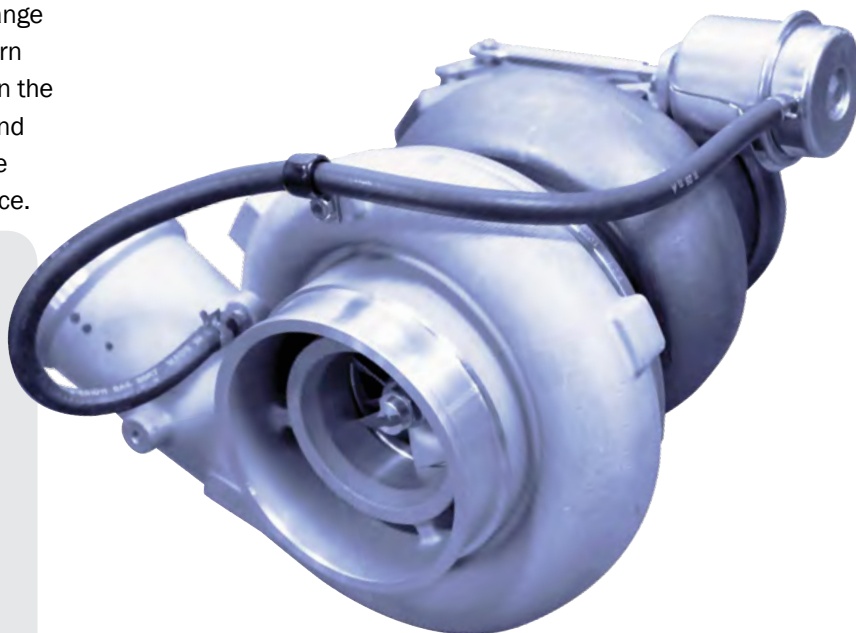

Five TRP turbo models are available through the PDC for C15 and 3406E CAT applications. All turbos are NEW Exchange (not remanufactured) and include hassle free core return criteria. The Thru-Bore design has an extended shaft on the turbine wheel that fits through the compressor wheel and increases durability. Steel threads on the shaft improve turbo life and 100% testing ensures reliable performance.

FEATURES & BENEFITS

All TRP Turbos are subjected to the following testing:

- » Computerized rotor group balancing improves rotor stability & increases bearing life
- » Air bearing component balancing ensures shafts & wheels exceed industry specifications
- » High speed cartridge balancing in final testing minimizes noise & vibration

Mounting gaskets are included with all TRP Turbos
