

A/C FREON COMPRESSORS

FEATURES & BENEFITS

- » Great value, quality at a competitive price
- » Clutch equipped with rubber dampened armature that increases clutch life by more than 30%
- » Diode in the harness protects clutch from harmful electrical surges
- » Meets industry specifications

Part# LE0121

TRP A/C COMPRESSORS - HEAVY DUTY

TRP® Freon Compressors feature a superior pad lock design that helps prevent vibration-related fitting leakage. A one-piece, all-steel crimp fitting design allows for stronger and more durable connection. TRP® Freon Compressors are “sealed” with factory nitrogen charge that keeps deadly moisture out of the compressor. Significant moisture damage can occur in as little as two hours of ports being unsealed.
